Policy Documents on Water Conservation

It is simply impossible to imagine human life without water, if there are no ample sources of water left then it would be a matter of great concern. Without water there will be no harvesting, no drinking water, no washing, cleaning and cooking as well. Hence it is very important to use our present water sources judiciously and try to save as much water as possible. It is very important to realize water conservation benefits and also to implement those in our day to day life. Water conservation encompasses the policies, strategies and activities to manage fresh water as a sustainable resource, and efforts to protect the water environment while maintaining a balance between current and future human demand. Population, household size and growth and affluence all affect how much water is used. Factors such as climate change will increase pressures on natural water resources, especially in manufacturing and agricultural irrigation. It is very important to realize the need for water conservation in the community as well as personal level.

The important policy objectives are as follows:

1. To promote effective water management college uses rain water harvesting.
2. To make efficient and environmentally responsible use of water, including identifying opportunities for water reuse.
3. To inspect taps for draining and repair immediately to avoid loss of potable water.
4. To resolve and manage water scarcity problem regularly.
5. To protect environment towards climatic changes and conservation of resources for drinking water.
6. To promote sound environmental management policies and practices throughout the campus.
7. To expand green cover on the college campus.
8. To reduce pollution, reduce resources consumption and eliminate wastes and conserve natural resources.
9. To create interest among the students in horticulture and gardening. .
10. To maintain energy, green and environment audit related issues.

Efforts on rainwater harvesting structures and utilization in the campus

The rainwater during the rainy season is charged into the water tank and wells on the college campus. Trees and lawns are maintained with water from the well. Wastewater is used for gardening.

The main tank on the college campus is used for the main storage of the water and used for laboratories and other purposes. The rainwater during the rainy season is charged into the tank and wells on the college campus.

Efforts on maintenance of water bodies and distribution system on the campus:

The water from the overhead tank is distributed to all taps on the campus. The maintenance of the plumbing system is outsourced. Whenever the problems are identified immediate actions are taken for restricting the wastage of water. Then plumbers are outsourced to fix the problem.
